

To Whom it May Concern:

Satellite Radio provides me and my family with traffic and weather along with a variety of other musical and talk venues that I just don't get to hear anywhere else. When I heard that the National Association of Broadcasters was submitting a petition (04-160) to limit local content, I felt that I needed to express my concern. As a voter and activist relating to issues of government-business relations, I feel that this would be a true disservice to all individuals who have purchased satellite radios and service. The NAB does not speak for me or those of us who spend our own money to listen to what we want on our own radios. They should not be able to dictate what I hear on my radio within the spectrum of FCC, state, and national laws of decency. Please regard this letter as a vote to stop petition 04-160. Allow leaders in the business community to conduct their business as they see fit and permit consumers a wide range of choices on their radios.
